A/B TESTING: CHECKOUT CONVERSION ANALYSIS

EXECUTIVE SUMMARY
Control visitors: 600
Control conversions: 57
Control conversion rate: 9.50%

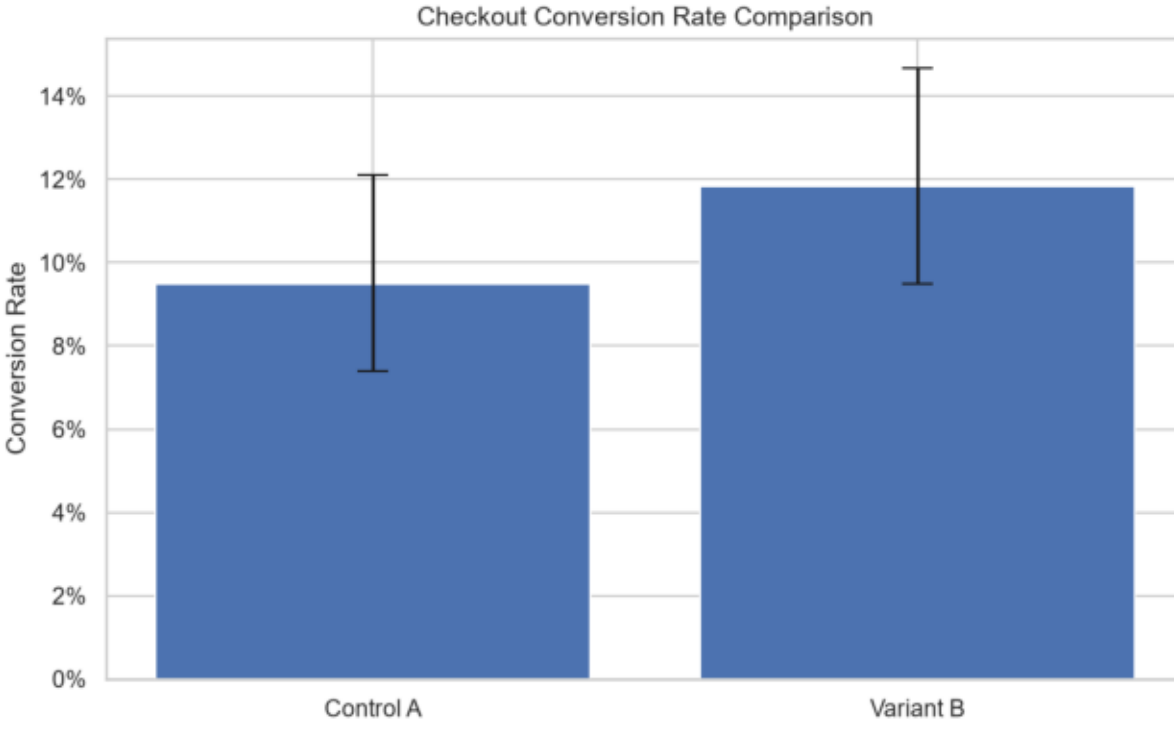

Variant visitors: 600
Variant conversions: 71
Variant conversion rate: 11.83%

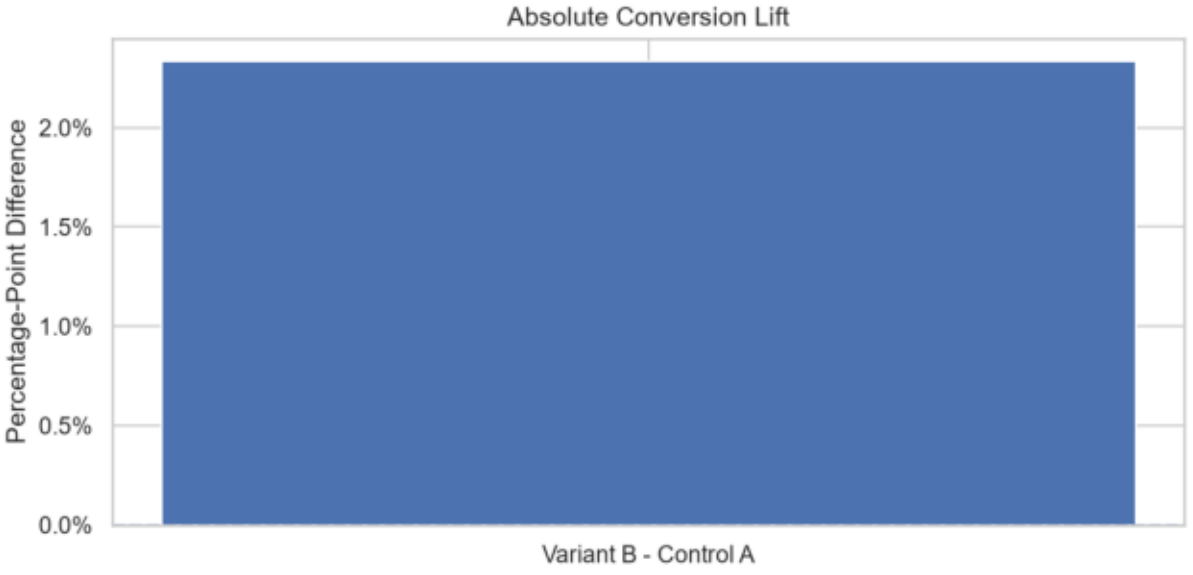

Absolute lift: 2.33%
Relative lift: 24.56%

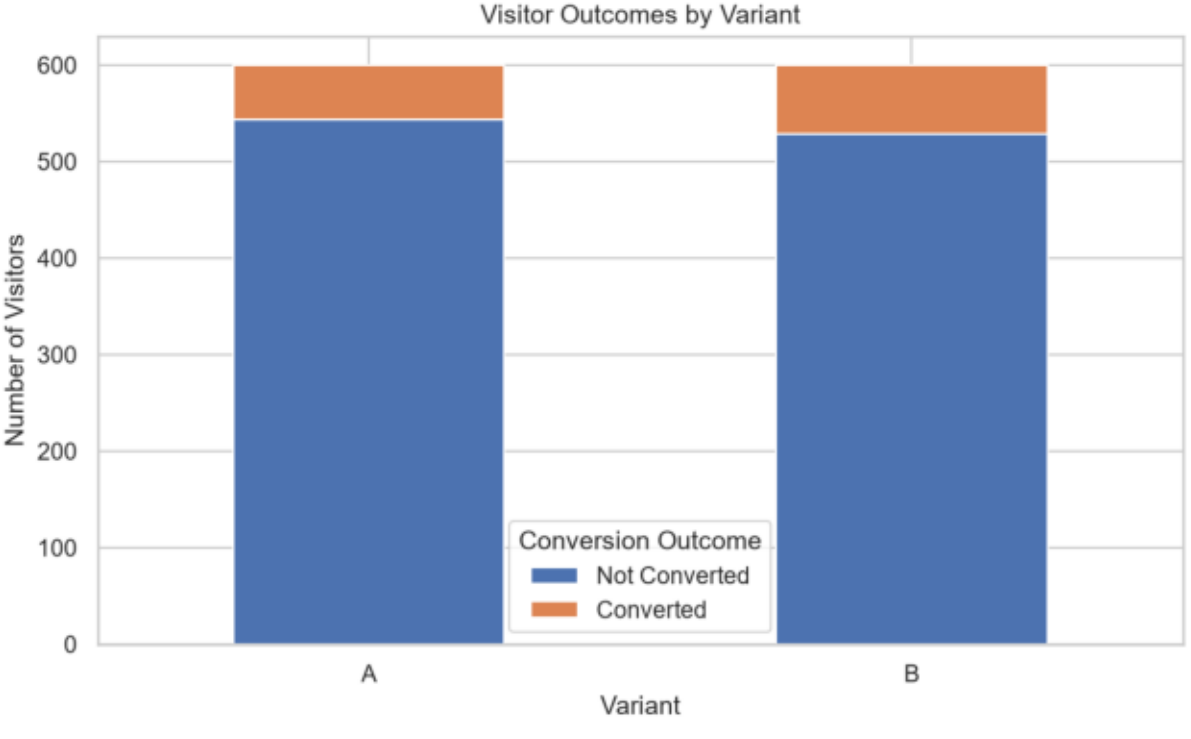

STATISTICAL RESULTS
Z-statistic: 1.3092
Z-test p-value: 0.190456
Chi-square statistic: 1.7141
Chi-square p-value: 0.190456
95% CI for lift: -1.18% to 5.85%
Cohen's h: 0.0757

EXECUTIVE RECOMMENDATION
The experiment has not established a statistically significant difference. Keep Control A for now while reviewing power, costs, and whether additional data or a redesigned experiment is justified.

LIMITATIONS
Results depend on experiment validity and correct outcome recording.
Statistical significance alone does not establish profitability.
